

HEAVY LIFTING TECHNOLOGIES

重型起重技術

RANGE OF PRODUCTS

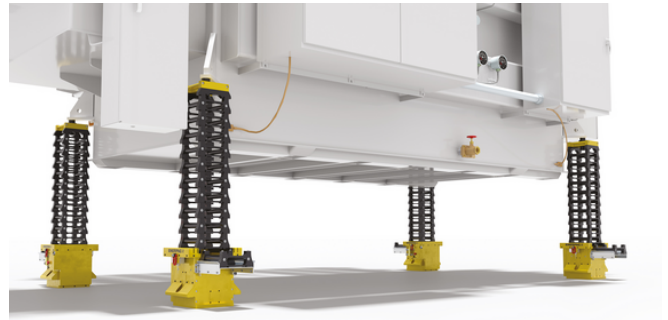

產品範圍

Incremental Lifting System with mechanical locking 帶有機械鎖的增量舉升系統

A more efficient and safer way to lift, hold and transport heavy load, alternative to climbing jacks with wooden cribbing

替代傳統爬式千斤頂更有效及更安全地頂升，固定及運輸重物

Hydraulic Gantries 液壓龍門起重機

Safe and efficient way to lift and position heavy load where traditional cranes are not an option. Suitable for heavy lifting and rigging professionals.

在傳統起重機所處的地方安全，有效地舉起重物並將其定位不是一個選擇。適合重型起重和索具專業人士。

Synchronous Hoisting and Load Positioning Systems 同步起升及加載定位系統

Computer controlling multiple point of rigging. Enabling a single crane to position heavy and unbalanced loads.

多點電腦控制吊索操作。僅單一起重機可以精確地放置重型和不平衡之重物

Synchronous Lifting Systems

同步頂升系統

Managing multiple points of lifting and lowering operations with one centralized control panel. High-precision positioning control.

通過一個單一控制面板管理多點升降操作，作高精度定位控制

Heavy-Lifting Strand Jack System

拉索千斤頂

World class strand jacks with precision control, durability and reliability

世界一流的絞線千斤頂，具有精確的控制，耐用性和可靠性

Self-Propelled Modular Transporters

自推進式模塊化推車

Compact design. Suitable for confined space operations. Each wheel units with steering function and a lifting cylinder.

窄體設計。非常適合在有限的空間內使用。每個車輪單元都有單獨的轉向系和提升油缸。
